Information for the Quarter 2 Year 2020

CAPITAL ADEQUACY

The Company monitors the solvency capital in compliance with the requirements from the OIC.

Thailand has implemented RBC regulation since September 2011. In December 2019 the RBC regulation was updated with the implementation of RBC II, which updates and enhances the capital standards to be more comprehensive.

The key metric used by the regulator is the Capital Adequacy Ratio ("CAR"), defined as Total Capital Available ("TCA") divided by Total Capital Required ("TCR"), which needs to remain above the supervisory CAR to maintain financial strength and avoid potential regulatory intervention.

The Company holds additional capital in excess of the TCR to comply with its internal capital requirements. This ensures that the Company's CAR will remain higher than 120% even after a shock that is expected to occur once in 10 years.

The table below illustrates that throughout the year, the Company has a strong capital position that is significantly above the supervisory CAR of 120%.

Unit: Million Baht

Canital Itama	Quar	ter 1	Quar	ter 2	Quar	ter 3
Capital Items	2020	2019	2020	2019	2020	2019
Capital Adequacy Ratio (%)	270	409	291	442	XXX	483
Total Capital Available	111,091	170,839	136,725	182,353	XXX	214,042
Total Capital Required	41,149	41,770	46,954	41,243	XXX	44,317

Remarks: - According to the OIC's RBC capital valuation of Life Insurance Companies, the Registrar may determine the necessary procedures to manage companies with a CAR below the followings:

- (1) 120% from December 31st, 2019 to December 31st, 2021
- (2) 140% from January 1st, 2022 onwards
- Capital refers to RBC capital valued according to the OIC's Notification on the Valuation of Assets and Liabilities of Life Insurance Companies
- Quarter 2 is 6-month accumulated operating results and Quarter 3 is 9-month accumulated operating results.

AIA COMPANY LIMITED

INTERIM FINANCIAL INFORMATION (UNAUDITED)
30 JUNE 2020

AUDITOR'S REPORT ON REVIEW OF INTERIM FINANCIAL INFORMATION

To the Executive Committee of AIA Company Limited

I have reviewed the interim financial information of AIA Company Limited which comprises the statement of financial position as at 30 June 2020, the related statements of comprehensive income for the three-month and six-month periods then ended, changes in Head Office's equity, and cash flows for the six-month periods then ended, and the condensed notes to the interim financial information. Management is responsible for the preparation and presentation of this interim financial information in accordance with Thai Accounting Standard 34, "Interim Financial Reporting". My responsibility is to express a conclusion on this interim financial information based on my review.

Scope of review

I conducted my review in accordance with Thai Standard on Review Engagements 2410, "Review of interim financial information performed by the independent auditor of the entity". A review of interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Thai Standards on Auditing and consequently does not enable me to obtain assurance that I would become aware of all significant matters that might be identified in an audit. Accordingly, I do not express an audit opinion.

Conclusion

Based on my review, nothing has come to my attention that causes me to believe that the accompanying interim financial information is not prepared, in all material respects, in accordance with Thai Accounting Standard 34, "Interim Financial Reporting".

Cash and cash equivalents at end of period	11,176,056,333	1,957,503,030

1. General information

AIA Company Limited ("the Branch") is a branch in Thailand of AIA Company Limited ("AIA") whose ultimate holding company is AIA Group Limited ("AIA Group"), a company incorporated in Hong Kong and listed on the Stock Exchange of Hong Kong Limited.

The Branch received its life insurance license under the laws of Thailand on 1 October 1938. The address of the Branch's registered office is as follows:

181 Surawongse Road, Bangrak, Bangkok 10500.

The principal business operations of the Branch is to provide life insurance, personal accident and health insurance.

This interim financial information has been approved by the Branch's management on 11 August 2020.

This interim financial information has been reviewed, not audited.

2. Basis of preparation

The interim financial information has been prepared in accordance with Thai Accounting Standard 34 Interim Financial Reporting. The primary financial information (statement of financial position, statement of comprehensive income, statement of changes in Head Office's equity and cash flows) is presented in a format consistent with the annual financial statements complying with Thai Accounting Standard 1 Presentation of Financial Statements. In addition, the interim financial information presentation is based on the formats of life insurance interim financial information attached in an Office of Insurance Commission's notification "Principle, methodology, condition and timing for preparation, submission and reporting of financial statements and operation performance for life insurance company (No.2) B.E. 2562" dated on 4 April 2019 ("OIC Notification"). The notes to the interim financial information are prepared in a condensed format. Additional notes are presented as required by the aforementioned OIC Notification.

The interim financial information should be read together with the annual financial statements for the year ended 31 December 2019.

An English version of the interim financial information has been prepared from the interim financial information that is in the Thai language. In the event of a conflict or a difference in interpretation between the two languages, the Thai language interim financial information shall prevail.

Income taxes in the interim periods are accrued by using the expected income taxes in the interim period.

3. Accounting policies

The accounting policies used in the preparation of the interim financial information are consistent with those used in the annual financial statements for the year ended 31 December 2019, except for the following:

- 1. the adoption of the new financial reporting standards as described in Note 4
- 2. the temporary exemption guidance to relieve the impact from COVID-19 (temporary measures to relieve the impact from COVID-19) announced by the Federation of Accounting Professions (TFAC) for the reporting period ended 30 June 2020.

4. Adoption of new financial reporting standards and changes in accounting policies

Adoption of new financial reporting standards

On 1 January 2020, the Branch passes criteria of temporary exemption from TFRS 9 Financial Instruments and TFRS 7 Financial Instruments: Disclosures under TFRS 4 (revised 2018) Insurance Contracts. The Branch is eligible to apply the 'financial instruments and disclosures for insurance companies' accounting guidance' ('the Accounting Guidance').

The Branch has adopted financial reporting standards relating to financial instruments (TAS 32, and the Accounting Guidance) and leases standard (TFRS 16) retrospectively from 1 January 2020, but has not restated comparatives for the 2019 reporting period, as permitted in the standards. The reclassifications and adjustments arising from the new requirements are therefore recognised in the opening statement of financial position on 1 January 2020.

The following tables show the adjustments and reclassifications made to the amounts recognised in each line item in the statement of financial position upon adoption of the financial reporting standards relate to financial instruments (TAS 32 and the Accounting Guidance) and leases standard (TFRS 16):

	As at 31 December 2019 Previously reported Baht	TAS 32 and the Accounting Guidance Reclassifications and adjustments Baht	TFRS 16 Adjustments Baht	As at 1 January 2020 Restated Baht
Assets				
Accrued income on investment Derivative assets Investment in securities	5,142,295,470 7,054,202,416 880,192,356,890	(970,819,138) 8,226,717,609 753,017,950	- - -	4,171,476,332 15,280,920,025 880,945,374,840
Loans and accrued interest receivables Other assets	32,240,355,289 1,907,604,409	891,282,939 	1,415,893,148	33,131,638,228 3,323,497,557
Total assets	926,536,814,474	8,900,199,360	1,415,893,148	936,852,906,982
Liabilities and Head Office's equity				
Liabilities Derivative liabilities Deferred tax liabilities Other liabilities	61,769,363 33,698,516,767 32,889,126,630	3,566,578,591 1,082,631,394	(3,306,572) 1,432,426,008	3,628,347,954 34,777,841,589 34,321,552,638
Total liabilities	66,649,412,760	4,649,209,985	1,429,119,436	72,727,742,181

Adoption of new financial reporting standards (Cont'd)

The following tables show the adjustments and reclassifications made to the amounts recognised in each line item in the statement of financial position upon adoption of the financial reporting standards relate to financial instruments (TAS 32 and the Accounting Guidance) and leases standard (TFRS 16): (Cont'd)

	As at 31 December 2019 Previously reported Baht	TAS 32 and the Accounting Guidance Reclassifications and adjustments Baht	TFRS 16 Adjustments Baht	As at 1 January 2020 Restated Baht
Head Office's Equity Remeasurements of investments measured at fair value through other comprehensive income, net of tax Branch's retained earnings	138,167,982,619 79,655,938,567	1,062,510,332 3,188,479,043	- (13,226,288)	139,230,492,951 82,831,191,322
Total Head Office's Equity	217,823,921,186	4,250,989,375	(13,226,288)	222,061,684,273
Total liabilities and Head Office's Equity	284,473,333,946	8,900,199,360	1,415,893,148	294,789,426,454

The adoption of the new financial reporting standards on financial instruments mainly affects the Branch's accounting treatment as follows:

Classification and measurement

- Currently, the Branch has equity instruments measured at cost of Baht 934 million. These
 instruments will be reclassified and remeasured to fair value through other comprehensive income
 with a corresponding adjustment to Head Office's equity of Baht 613 million, net of tax, as of
 1 January 2020.
- Currently, the Branch has derivative assets and liabilities measured on an accrual basis of Baht 7,054 million and Baht 62 million, respectively. Accrued interest receivables and payables were recognised as part of accrued income from investment amounting to Baht 2,476 million and Baht 2,396 million, respectively. These instruments will be reclassified and remeasured to fair value through profit or loss with a corresponding adjustment to retained earnings of Baht 3,638 million, net of tax, as of 1 January 2020.
- Currently, the Branch has financial instruments with embedded derivatives and warrants of Baht 312 million. These instruments will be reclassified and remeasured from fair value to other comprehensive income to fair value through profit or loss with a corresponding adjustment from other comprehensive income to retained earnings of Baht 13 million, net of tax, as of 1 January 2020.
- On the adoption of TAS 32 and the Accounting Guidance, the Branch shall classify financial instruments as equity instruments or debt instruments follow definition in paragraph 11 of TAS 32. For the classification of investment in Thailand's Real Estate Investment Trust (REIT) and Infrastructure Trust, Infrastructure Fund, and Property Fund, the Branch applies the TFAC's clarification announced on 14 May 2020. The announcement requires the Branch to classify the aforementioned investments as investment in equity instruments. Those investments are designated at fair value through profit or loss.

Adoption of new financial reporting standards (Cont'd)

<u>Impairment</u>

The new requirements on the impairment losses will lead to expected credit losses having to be considered and recognised at the initial recognition and subsequent period. The Branch accounts for expected credit losses which involves a three-stage expected credit loss impairment model. The stage dictates how the entity measures impairment losses and applies the effective interest rate method. As of 1 January 2020, the Branch recognised impairment losses for investment in securities of Baht 457 million, net of tax, and loans and accrued interest receivables of Baht 5 million, net of tax. The transition adjustment will be recognised as an adjustment to the opening balance of other comprehensive income to retained earning amounting to Baht 462 million, net of tax.

The Branch adopted TFRS 16 and recognised lease liabilities in relation to leases which had previously been classified as 'operating leases' under the principles of TAS 17 Leases. At adoption of TFRS 16, lease liabilities at transition date were measured at the present value of the remaining lease payments, discounted using the lessee's incremental borrowing rate as of 1 January 2020. The weighted average lessee's incremental borrowing rate applied to the lease liabilities on 1 January 2020 was 2.52%

	Thousand Baht
Operating lease commitments disclosed as at	
31 December 2019	435,036
Less Discounted using the lessee's incremental borrowing rate at the date of initial application	(68,300)
Add Adjustments as a result of a different treatment of extension and termination options	990,973
Add Other adjustments	74,717
Lease liability recognised as at 1 January 2020	1,432,426

The associated right-of-use assets for property leases were measured on a retrospective basis as if TFRS 16 had always been applied. The right-of use assets were measured at the amount equal to the lease liability, adjusted by the amount of any prepayment relating to that lease recognised in the statement of financial position as at 31 December 2019. There were no onerous lease contracts that would have required an adjustment to the right-of-use assets at the date of initial application.

The recognised right-of-use assets relate to the following types of assets:

	30 June 2020 Thousand Baht	1 January 2020 Thousand Baht
Land Buildings and improvements Others	246,476 1,309,347 2,376	255,380 1,485,290
Total right-of-use assets	1,558,199	1,740,670

Adoption of new financial reporting standards (Cont'd)

Practical expedients applied

In applying TFRS 16 for the first time, the Branch has used the following practical expedients permitted by the standard with lease agreements effective prior to 1 January 2020:

- the accounting for operating leases with a remaining lease term of less than 12 months as at
 1 January 2020 as short-term leases or lease contracts for low value assets, and
- the use of hindsight in determining the lease term where the contract contains options to extend or terminate the lease

Changes in accounting policies from adoption of the financial reporting standards related to financial instruments and leases

Investment in securities

Classification and measurements

From 1 January 2020, the Branch classifies its financial assets as follows:

- Investments measured at fair value through profit or loss (FVPL)
- Investments measured at fair value through other comprehensive income (FVOCI)
- Investments measured at amortised cost
- Investments designated at fair value through profit or loss

The Branch initially recognises a financial asset on trade date at its fair value plus transaction costs that are directly attributable to the acquisition of the financial asset.

For financial assets with embedded derivatives, the Branch designated the entire hybrid contract as fair value through profit or loss.

Impairment

From 1 January 2020, the Branch assesses expected credit loss on a forward looking basis for its financial assets classified as debt securities carried at FVOCI and at amortised cost. The impairment methodology applied depends on whether there has been a significant increase in credit risk. The Branch always accounts for expected credit losses which involves a three-stage expected credit loss impairment model. The stage dictates how the entity measures impairment losses and applies the effective interest rate method. In which, the three-stage expected credit loss impairment will be as the following stages:

- Stage 1 from initial recognition of a financial assets to the date on which the credit risk of the asset has not increased significantly relative to its initial recognition, a loss allowance is recognised equal to the credit losses expected to result from defaults occurring over the next 12 months.
- Stage 2 following a significant increase in credit risk relative to the initial recognition of the financial assets, a loss allowance is recognised equal to the credit losses expected over the remaining life of the asset.
- Stage 3 When a financial asset is considered to be credit-impaired, a loss allowance equal to full
 lifetime expected credit losses is to be recognised.

The expected credit loss will be recognised in profit or loss.

Changes in accounting policies from adoption of the financial reporting standards related to financial instruments and leases (Cont'd)

Derivative assets and liabilities

Derivatives are initially recognised at fair value on the date a derivative contract is entered into and are subsequently measured to their fair value at the end of each reporting period. The method of recognising the resulting gain or loss depends on whether or not the derivative is applied hedge accounting, and if so, the nature of the item being hedged.

Derivative financial instruments that are not applied hedge accounting is re-measured at fair values which are obtained from quoted market price, or other widely used methods. Gain or loss on such agreements and changes in related fair values as at period end are reflected in profit or loss

When derivatives financial instruments are applied hedge accounting, the Branch measures derivatives classified as hedging transactions according to the natures of items being hedged. The Branch designates certain derivatives as:

1) Fair value hedge

Changes in the fair value of derivatives that are designated and qualified as fair value hedges are recorded in profit or loss, together with any changes in the fair value of the hedged items that are attributable to the hedged risk.

Cash flow hedge

The effective portion of changes in fair value of derivatives that are designated and qualified as cash flow hedges are recognised in other comprehensive income. The gain and loss relating to the ineffective portion is recognised immediately in profit or loss. Amount accumulated in equity are recycled to profit or loss in the periods in which the hedged item will affect profit or loss.

3) Net investment in foreign operation hedge

Hedge of net investment in foreign operations are accounted for similar to cash flow hedge.

At the inception of the hedge, the Branch documents the relationship between hedged items and hedging instruments, as well as their risk management objective. The Branch also assesses the hedge effectiveness in offsetting changes in fair values or cash flows of hedged items on an ongoing basis both at the hedge inception and every financial reporting date.

The effective portion of changes in the fair value of derivatives that are designated and qualified as cash flow hedge is recognised in the cash flow hedge reserve within Head Office's equity. The gain or loss relating to the ineffective portion is recognised immediately in profit or loss, within fair value gain/loss. When cross currency swap contracts are used to hedge interest rate risk and foreign exchange risk, the Branch chooses to exclude the foreign currency basis spread from the designation of the derivatives as hedging instruments. Gains or losses relating to the effective portion of the change in fair value of cross currency swap contracts excluding foreign currency basis spread are recognised in the cash flow hedge reserve within Head Office's equity. The change in foreign currency basis spread at the swap contract that relates to the hedged item is recognised within other comprehensive income in the costs of hedging reserve within Head Office's equity.

Changes in accounting policies from adoption of the financial reporting standards related to financial instruments and leases (Cont'd)

Derivative assets and liabilities (Cont'd)

Amounts accumulated in Head Office's equity are reclassified in the periods when the hedged item affects profit or loss. When a hedging instrument expires, or is sold or terminated, or when a hedge no longer meets the criteria for hedge accounting, any cumulative deferred gain or loss and deferred costs of hedging in Head Office's equity at that time remains in Head Office's equity until the forecast transaction occurs. When the forecast transaction is no longer expected to occur, the cumulative deferred gain or loss and deferred costs of hedging that were reported in Head Office's equity are immediately reclassified to profit or loss.

Certain derivative instruments do not qualify for hedge accounting. Changes in the fair value of any derivatives instrument that does not qualify for hedge accounting are recognised immediately in profit or loss and are included in fair value gain/loss.

Right-of-use assets and lease liabilities

The Branch leases property, plant and equipment. Rental contracts are typically made for fixed periods between 2 to 30 years but may have extension options. Before 2020 financial year, leases of property, plant and equipment were classified as operating leases. Payments made under operating leases (net of any incentives received from the lessor) were charged to profit or loss on a straight-line basis over the period of the lease.

From 1 January 2020, leases are recognised as a right-of-use asset and a corresponding liability at the date at which the leased asset is available for use by the Branch. Each lease payment is allocated between the liability and finance cost. The finance cost is charged to profit or loss over the lease period so as to produce a constant periodic rate of interest on the remaining balance of the liability for each period. The right-of-use asset is depreciated over the shorter of the asset's useful life and the lease term on a straight-line basis. Right-of-use assets are recorded as part of "Other assets" in the statement of financial positions.

Assets and liabilities arising from a lease are initially measured on a present value basis. Lease liabilities include the net present value of the following lease payments:

- fixed payments (including in-substance fixed payments), less any lease incentives receivable
- variable lease payment that are based on an index or a rate
- amounts expected to be payable by the lessee under residual value guarantees
- the exercise price of a purchase option if the lessee is reasonably certain to exercise that option,
- payments of penalties for terminating the lease, if the lease term reflects the lessee exercising that option.

The lease payments are discounted using the interest rate implicit in the lease. If that rate cannot be determined, the lessee's incremental borrowing rate is used, being the rate that the lessee would have to pay to borrow the funds necessary to obtain an asset of similar value in a similar economic environment with similar terms and conditions.

Changes in accounting policies from adoption of the financial reporting standards related to financial instruments and leases (Cont'd)

Right-of-use assets and lease liabilities (Cont'd)

Right-of-use assets are measured at cost comprising the following:

- the amount of the initial measurement of lease liability
- any lease prepayments made at or before the commencement date less any lease incentives received
- any initial direct costs, and
- restoration costs.

Payments associated with short-term leases and leases of low-value assets are recognised on a straight-line basis as an expense in profit or loss. Short-term leases are leases with a lease term of 12 months or less. Low-value assets comprised of facsimiles.

During the reporting period, the Branch received discounts in the lease payments from lessors due to the COVID-19 situation. The Branch has chosen to apply the temporary measures to relieve the impact from COVID-19 announced by TFAC for the reporting periods ending between 1 January 2020 and 31 December 2020 by reducing lease liabilities in the proportion of the reduction to the lease payments throughout the period that the Branch has received the reduction and reversing depreciation charges on the right-of-use assets and interest expenses on the lease liabilities recognised in the same proportion of Baht 3,918,335 and Baht 352,303, respectively. The differences between the reduction of the lease liabilities and the reversal of the expenses of Baht 107,184 are recognised in profit or loss.

5. Estimates

The preparation of interim financial information requires management to make judgments, estimates and assumptions that affect the application of accounting policies lead to the reported amounts of assets and liabilities, income and expense. Actual results may differ from these estimates.

In preparing this interim financial information, the significant judgements made by management in applying the Branch's accounting policies and the key sources of estimation uncertainty were the same as those that applied to the financial statements for the year ended 31 December 2019.

6. Fair value

6.1 Fair value estimation

The table below presents assets carried at fair value, by valuation method. The different levels have been defined as follows:

- Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities, and the Branch is able to access that market on valuation date.
- Level 2: Inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly or indirectly.
- Level 3: Inputs for the asset or liability that are not based on observable market data.

Fair value (Cont'd) 6.

6.1 Fair value estimation (Cont'd)

The following table presents the Branch's assets and liabilities that are measured and recognised at fair value as at 30 June 2020 and 31 December 2019.

_	Level 1 Thousand Baht	Level 2 Thousand Baht	Level 3 Thousand Baht	Total Thousand Baht
As at 30 June 2020 (Unaudited)

The Branch has no significant tr	ansfer betwee	n levels during	the period.	

The Branch has no significant transfer between levels during the period.

6. Fair value (Cont'd)

6.2 Valuation techniques used to derive Level 1 fair values

The fair value of financial instruments traded in active markets is based on quoted market prices at the statement of financial position date. The quoted market price used for financial assets held by the Branch is obtained from exchange markets and asset management companies. These instruments are included in Level 1.

6.3 Valuation techniques used to derive Level 2 fair values

Level 2 marketable debt securities are fair valued using a discounted cash flow approach, which discounts the contractual cash flows using discount rates derived from observable market prices of other quoted debt instruments.

Level 2 marketable equity securities are fair valued based on closed price provided by an asset management company.

Level 2 derivative assets and liabilities are fair valued using a discounted cash flow approach, which discounts the contractual cash flows using discount rates derived from observable interest rate and foreign currency exchange rate.

There were no changes in valuation techniques during the periods.

6.4 Valuation techniques used to derive Level 3 fair values

The changes in investment property, and land and building are disclosed in Notes 14, and 17, respectively. The Branch engaged an external independent and qualified appraiser to determine the fair value of the investment property, and land and building. Different valuation techniques may be adopted to reach the fair value of the properties. Under the Market Data Approach, records of recent sales and offerings of similar property are analysed and comparisons are made for factors such as size, location, quality and prospective use. The Discounted Cash Flow Approach may be used by reference to net rental income allowing for reversionary income potential to estimate the fair value of the properties. On some occasions, the Cost Approach is used as well to calculate the fair value which reflects the cost that would be required to replace the service capacity of the property.

6. Fair value (Cont'd)

6.4 Valuation techniques used to derive Level 3 fair values (Cont'd)

The following table presents the changes in Level 3 financial instruments for the period ended 30 June 2020 and for the year ended 31 December 2019.

	(Unaudited) Investments measured at fair value through other comprehensive income Equity security 30 June 2020 Thousand Baht	(Audited) Available-for-sale Equity security 31 December 2019 Thousand Baht
Beginning balance as at 1 January	1,700,558	10,192
Transfer out of Level 3 Book value Loss recognised in profit or loss		(31,675) 21,483
Net carrying value at transfer date Gains on remeasuring investments	1,700,558	-
measured at fair value through other comprehensive income	114,615	_
Closing balance at the end of period/year	1,815,173	_

As at 1 January 2020, general investments in equity securities are reclassified and remeasured under the Accounting Guidance to fair value through other comprehensive income employing an internally developed financial modelling.

Key unobservable input is discount rate. The increase or decrease in discount rate by 1% will impact the fair value of these instruments by decreasing 1.13% and increasing 1.27%, respectively.

For the year ended 31 December 2019, these securities used to be periodically fair valued at market price but has been fair valued employing an internally developed financial modelling. This is because the market price is not available due to trade suspension. Certain securities have been entirely disposed in 2019.

The Branch's policy is to recognise transfers into and transfers out of fair value hierarchy levels as of the date of the event or change in circumstances that caused the transfer.

There were no changes in valuation techniques during the periods.

Valuation process

Management has put a process of performing the valuations of financial assets required for financial reporting purposes, including Level 3 fair values. Appropriate valuation techniques and unobservable inputs are selectively used based on the characteristic of financial assets. The valuation of Level 3 fair value is reviewed and approved by management for financial reporting purposes.

The Branch engaged an external independent and qualified appraiser to determine the fair value of the investment property, and land and building on the basis of the highest and best use of the properties that is physically possible, legally permissible and financially feasible, which will be revised every 6 months, and 12 months, respectively.

Changes in level (if any) are analysed at the reporting date by management.

7. Cash and cash equivalents

	(Unaudited) 30 June 2020 Thousand Baht	(Audited) 31 December 2019 Thousand Baht
Cash on hand Deposits held at call with banks and financial institutions Short-term investments	33,124 4,288,619 6,854,313	23,821 2,785,010 2,744,734

12. Investment in securities (Cont'd)

For the three-month period ended 30 June 2020, the Branch had revenue recognised relating to investment as follows:

- Interest income and dividend income from investments amounting to Baht 6,320 million and Baht 1,124 million, respectively (30 June 2019: Baht 7,024 million and Baht 1,105 million, respectively).
- Consideration received from selling investments totalling Baht 25,724 million (30 June 2019: Baht 24,409 million) and loss from selling investments totalling Baht 636 million (30 June 2019: gain from selling investments totalling Baht 1,907 million).

For the six-month period ended 30 June 2020, the Branch had revenue recognised relating to investment as follows:

- Interest income and dividend income from investments amounting to Baht 12,953 million and Baht 2,195 million, respectively (30 June 2019: Baht 14,012 million and Baht 2,052 million, respectively).
- Consideration received from selling investments totalling Baht 68,887 million (30 June 2019: Baht 36,392 million) and loss from selling investments totalling Baht 4,555 million (30 June 2019: gain from selling investments totalling Baht 2,760 million).

As at 30 June 2020, the Branch had government bonds and promissory notes deposited with the Office of Insurance Commission in order to comply with the Life Insurance Act with a fair value amounting to Baht 198,086 million (As at 31 December 2019: Baht 205,970 million).

During April to June 2017, the Branch partially revised the classification of held-to-maturity debt securities to available-for-sale due to a change in investment policy. As at 30 June 2020, the unrealised gain arising from the difference between the fair value and amortised cost of the debt securities was included in gain/loss on remeasuring investments measured at fair value through other comprehensive income within Head Office's equity of Baht 9,427 million and Baht 7,542 million, net of tax. (As at 31 December 2019: Baht 12,346 million and Baht 9,877 million, net of tax) and the amortised cost of the transferred debt securities equaled to Baht 60,978 million (As at 31 December 2019: Baht 83,032 million). For the period ended 30 June 2020, the realised gain from partial sale of reclassified debt securities is Baht 1,009 million (30 June 2019: Baht 1,321 million).

On 1 March 2020, the Branch revised the classification of investments in mutual funds from investments measured at fair value through other comprehensive income to investments designated at fair value through profit or loss to align with the Branch's investment policy. As at the reclassification date, the Branch recognised unrealised gain/loss amounting to Baht 581 million in profit or loss.

13. Loans and accrued interest receivables

The details of loans and accrued interest receivables are as follows:

16.410.000	72,429	(31)	(263)	367,508	16,849,643

In 2019 and 2020, the Branch engaged an external independent and qualified appraiser to determine the fair value of the investment property. The valuation techniques and valuation process of investment property are disclosed in Note 6.4.

(30 June 2019: Baht 252 million and Baht 493 million, respectively) and its direct operating expenses (including repair and maintenance) arise from investment property that generated rental income amounting to Baht 70 million and Baht 134 million, respectively (30 June 2019: Baht 34 million and Baht 70 million and Baht 134 million, respectively). For the three-month and six-month period ended 30 June 2020, the investment property generated rental income amounting to Baht 247 million and Baht 512 million, respectively

14. Investment property (Cont'd)

14.1 Lease revenue arising from operating lease contracts

A maturity analysis of undiscounted lease revenue arising from operating lease contracts of investment properties are as follows:

Maturing	(Unaudited) 30 June 2020 Thousand Baht
Within 1 year Between 1 to 2 years Between 2 to 3 years Between 3 to 4 years Between 4 to 5 years Later than 5 years	698,418 343,091 94,615 36,095 34,256 301,105
Total	1,507,580

15. Investment in associates

The Branch has interests in an immaterial associate.

Investment in associate is accounted by using the cost method as follows:

		Ownershi	p interest	Cost m	ethod
Associates	Type of business	(Unaudited) 30 June 2020 %	(Audited) 31 December 2019 %	(Unaudited) 30 June 2020 Thousand Baht	(Audited) 31 December 2019 Thousand Baht
P.C AIA Company Limited	Real estate	49	49	171,500	171,500
Total				171,500	171,500

The Branch has not presented financial statements in which investments in associate is accounted for using the equity method because the ultimate holding company (AIA Group) uses the equity method in the consolidated financial statements which are made available for public use. This is permitted under TAS 28 (revised 2019) "Investment in Associates and Joint Ventures".

Total	96,152	109,365

29. Contingent liabilities and commitments

As indicated in Note 4, the Branch has adopted TFRS 16 retrospectively from 1 January 2020, but has not restated comparatives for the 2019 reporting period as permitted under the specific transition provisions in the standard. Prior to the adoption of TFRS 16, the Branch had future aggregate minimum lease payments under non-cancellable operating leases as follows:

	(Audited) 31 December 2019 Thousand Baht
Not later than 1 year Later than 1 year but not later than 5 years	321,769 113,267
Total	435,036

As at 30 June 2020, the Branch had contractual commitment from contracts for investment property projects with the amount at the maximum of Baht 3,696 million (As at 31 December 2019: at the maximum of Baht 492 million). Commitments arising from short-term leases and low-value leases are not material to the interim financial information.

30. Events occurring after the reporting date

In the first and second quarter of 2020, the Branch is facing the uncertain impact of the COVID-19 virus and the measures taken to limit its spread. The Branch is closely monitoring the development of situation.

MATERIAL CHANGE 2.2 THE COMPANY STRUCTURE

MATERIAL CHANGE 2.3 BOARD AND MANAGEMENT STRUCTURE

Board and Management

Wai Cheong Fung Chief Executive Officer

Responsible for the successful leadership and management of the AIA Thailand to fulfil AIA Group's vision of being a pre-eminent life insurance provider in Asia Pacific and its purpose of driving social and economic development across the region.

Hiew Tet Chian Chief Financial Officer

Responsible for overseeing financial strategies as well as strategic business plans and projects of the company for future business growth. This includes financial reporting, business analysis, and budgeting. Providing consultative support to planning initiatives through financial and management information analyses and recommendation. In addition, managing Actuarial, Real Estate, Distribution Administration & Management Information, and Project Management Office to support the business.

Johann Detoit
Chief Investment Officer

Responsible for formulating and recommending the overall investment plan and asset allocation strategy and implementation of the asset allocation and yield enhancement strategies to maximize investment portfolio with proper risk management to support insurance products & asset liability management.

Loo Boon Teik Chief Risk Officer

Responsible for the development of relevant risk and compliance framework, policies and procedures and overseeing the implementation of an effective risk assessment and compliance program. Engaging with key business stakeholders to ensure key regulatory, ethical, financial and operation risks (including emerging risks) are identified and properly managed, and ensure compliance with all regulatory requirements.

Julie Van Nuffel General Counsel and Business Development

Responsible for supporting the company in setting and executing its corporate strategy, as well as in managing its legal risk (but excluding providing any legal advice, legal services or litigation work with respect to Thai law).

Kris Chantanotoke Chief Agency Officer

Responsible for driving the sustainable growth of the agency business and developing short-term and long-term business objectives and targets. Driving agency transformation and enhancing agency force's engagement through enhanced service levels and ongoing sales initiatives. Managing, Coaching, and supporting Agency Distribution Management on production management and another field management.

Aekkaratt Thitimon
Chief Marketing Officer

Responsible for overseeing the planning, development and execution of an organization's product strategy, marketing, branding and advertising initiatives. The primary responsibility is to generate revenue by increasing sales through successful marketing for the entire organization, using market research, pricing, product marketing, marketing communications, advertising and public relations.

Sarunya Tienthavorn Chief Human Resources Officer

Responsible for driving the development and execution of AIA Thailand's People Strategy to support the company's business growth, focusing on talent and leadership development, succession planning, as well as organizational and performance management. Managing overall HR activities to ensure that all AIA policies / procedures properly adopted and executed efficiently and effectively.

Alisa Simaroj Chief Life Officer

Responsible for managing and leading the implementation of appropriate processes and initiatives in the areas of Frontend Operations, Technical Operations, Operations Strategies & Support, Operations System, Life Claims, and Medical to achieve the company's objectives and business growth targets.

Kitti Manakongtreecheep Chief Technology Officer

Responsible for driving and developing digital initiatives to increase overall efficiencies and productivity of the company to meet the evolving needs of the customers. Planning and supporting business and managing data center in optimizing the usage of resources (staff, computer, office automation equipment) to improve business operations and to control operation expenses.

Darren Thomson
Chief Strategic
Bancassurance Alliance
Officer

Responsible for managing the relationship with an exclusive bank partner (BBL) including formulating and executing the short to long term strategic plans to support the growth, profitability and operational objectives within the regulatory framework. Providing leadership, directions to the team to meet short, medium and long term financial goals and ambitions.

Chiraporn Kanistarath
Chief Corporate Solutions &
Partnership Distribution

Responsible for synergizing both Corporate Solutions and Partnership Distribution teams' capacity to leverage the relationship management with partners of AIA Thailand.
